### **Geobiology/Geopathic Stress and its effect on Human and Stock health: problems and solutions**

Geobiology is a study of the influence of "earth energies" on all forms of life. The earth is threaded with energy lines or meridians of electromagnetic energy, which have a powerful influence on living things. Scientists have proven this invisible energy passes through all matter, affecting every living system on the planet, in either a negative or positive way.

All life forms are electromagnetic creatures with every cell in the living system an electrical battery. The electrical system is reflected even more subtly as in the human aura, which is a photographable and measurable electrical field.

Recognizing these phenomena, Geobiologists work to ensure that the area where people live or where live stock live in is clear of "geopathic stress" or zones of energy which conflict with, or cause harm to living organisms.

This may be termed as "energy balancing" and it addresses only those negative aspects, which harmfully interact with the electromagnetic world around our biomagnetic bodies. So, bodily stress is often caused by a geobiological stimulus; thus the term "geopathic stress".

People correctly assume that Geobiology is similar to the oriental practice of "Feng-Shui" or Chinese geomancy and the Indian Vastu Shastra, are traditional sciences which have based their laws on observations made over thousands of years, which have been verified, tested and refined during centuries, by multiple applications.

Feng-Shui teaches us how to influence the development of our life, how to swim using the power of the current, instead of struggling against its flow. However, Feng-Shui is to be used in coordination with Geobiology that studies the underground and the impact of its vertical energies. If your bed is located between the door and the window, a situation forbidden by Feng-Shui, one is not to relocate it over a fault or underground stream, since these have a destructive effect on the human body. Faults route Gamma rays, from the Earth's mantle. Gamma rays have a strong ionizing effect (free radicals). Underground streams cause electrostatic fields that disturb our endocrine glands and weaken our immunization.

A partial list of geopathic stress would include sleep disorders, tingling, numbness and or pain in arms and legs, chronic fatigue, aching and swelling, dizziness, frequent headaches, vision problems, disorientation, memory loss, instability, stress, nausea, inability to heal, allergies, problematic menstrual cycles, anxiety, listlessness, resistance to medical treatment, inability to absorb vitamins and minerals, ADD, hyperactivity, depression and a general feeling of malaise.

**The Scientific Community is definitely aware of these energy zones.**

Scientific statements include those from Duhlwich Health Society. Rolf Gordon, 120 Gypsy Hill, London SE191PL. Their research confirms. . . "90% of all cancers of cervical, breast and lung are confirmed as geopathic stress. In nearly all cases of suicide, geopathic stress was present. Suffering (was) released when geopathic stresses were absent.

Dr. Otto Bergmann, Professor at University of Austria tested 989 people over two years. 462,421 measurements taken in 6,942 individual tests. Blood sedimentation, electric conductance of muscle points, blood pressure, heartbeat, breathing, skin resistance and blood circulation were all considered. It was determined that dire consequences resulted from continuous exposure to geopathic zones over many years.

Dr. Palle Gad, surgeon in Aahus Denmark, know for his studies of SIDS (Sudden Infant Death Syndrome) attributed 14 of 18 deaths to cribs in located in negative geopathic zones. Following the law of averages only 1 to 2 should have been found in geopathic stressed places. Over 3,000 SIDS deaths occur in Britain each year. How many occur in the United States?

Dr. Enid Worsch, professor. Notes that in 1990, of about 600 cancer cases, fewer than 5% had any connection with geopathic stress.

Dr. E. Hartmann [Hartman Lines], with over 30 years of practice, has noted that **CANCER IS A DISEASE OF LOCATION** triggered off by geopathic stress. We all produce cancerous cells on a regular basis but they are normally destroyed by our body's immune system. Geopathic stress, on its own, does not cause cancer but weakens the immune system.

Roger A. Rose. FIMCS, MAA, MS, a BIO-Med practitioner, of Dunstable England says that over 50 M.E. with (Myalic Encephlomyelitis: Post Viral Fatigue Syndrome) sufferers during three years of research were found to be geopathicly stressed. This must be addressed before progress can be made.

Geopathic stress attacks the immune system. Spleen and thyroid are nearly always found to be weak. Van Pohl... the "Grand Old Man" of geopathic stress estimated in the 1920's that 8% of all locations were geopathically stressed. In light of this growing body of information it is time we begin to address and offer solutions to the problem of geopathic stress. We are addressing these "Negative to Human" or "Negative to Live Stock", energy lines in an effort to make our living and working environments safer.

One method, by far the most common, is to dowse for these negative lines on the property and map them to show direction of flow and intersection points. These intersection or crossing points are the most dangerous areas not only to human health but to almost all life forms.

The energy crosses create a counter-clockwise spin, which is especially toxic to our systems. In days past the cure was to move beds and chairs or move livestock away from crossing points. Its never a good idea to spend a lot of time on the crossing point.

Geobiologists who dowsed the pyramid of Giza discovered that the inside of the pyramid was totally clean of hartman lines, around the pyramid 14 lines one next two the other create a thick energetic wall that stops the visitor before his entrance to the building. We are not sure about how the ancient architects pushed the lines outside the building, but we think their tools were intent and sacred geometry.

Another grid was discovered by Curry [Curry lines], he was a meteorologist and his research showed that the lines become three to five times wider before earthquakes. This is probably what warn animals before natural catastrophes, so they can run away in time.

Ancient builders of all cultures around the world knew of the global grid and they had the knowledge of many energies circulating through the earth. They have found various solutions to balance these energies, to move lines and place them in a way that suited their planning.

Some solutions involved earth acupuncture, by placing rods into the ground to intersect and bounce the energy before it could reach the house or grounds. This required a thorough assessment along the perimeter of the property and a blocking of all negative energies, which flow into the area. Care had to be taken to determine where lines enter.

Devic clearing is used by some. This Devic Realm is parallel to the human realm and is a kingdom which is hierarchical including elementals, nature spirits of various levels. There now are also devic energies reflecting our electronic and technical creations.

Harmonizers "Light Life Technology" are now used by many. See "field reports" [www.earthtalk.org.nz](http://www.earthtalk.org.nz)

We recommend that when you are interested in purchasing and applying this "Light Life Technology", is that you first read one of Slim Spurling books;

"Slim Spurling's Universe" by Cal Garrison, eBook  
<http://www.lightlifetechnology.com/product-p/723.htm>

"In the Mind of a Master" by Susan Anderson with Slim Spurling, Soft Cover  
<http://www.lightlifetechnology.com/product-p/728sc.htm>.

**Personal applications**, workshops are also available, Slim Spurling has trained Geobiologist around the world, find one you are comfortable with.

**Commercial applications**, it is advisable to receive support from a trained Geobiologist for about 3 growing seasons or for a few years, having the knowledge to enable your organization to adjust to the beneficial positive changes, each location has its own personality, and having a series workshops with your unique projects enables a commercial operation to be more successful.

**Supporting Geobiologist**
